

How to Measure your Cushion for Wool Batting

Five reasons to use WOOL batting to wrap your latex foam cushion core:

1. 'Softens the edges' and fills out the cushion cover for a wrinkle-free finish.
2. Provides a natural 'flame barrier' between the outer fabric and the foam core.
3. Protects the foam from damaging UV light coming through the cover fabric.
4. Wool provides a thicker layer of protection than the standard polyester batting.
5. NaturalUpholstery.com's wool is a natural product, sustainably produced using sheep-friendly practices.

Follow the steps below to determine how much wool batting to buy to 'book-wrap' your latex foam cushion core (see page 2 for an illustration of book-wrap).

Use the diagram below as a guide to measure your cushion dimensions:

Width = longest dimension of face
 Length = shortest dimension of face
 Depth = thickness of cushion core

Step 1: measure the dimensions of your cushion and record them here:

width = _____, length = _____, depth = _____ (all measurements are inches)

Step 2: enter the width & depth dimensions here:

2 x _____ + 2 x _____ = total _____ (inches)
 (width) (depth)

Step 3: Use the total from Step 2 to determine which option to use below to calculate how many inches to buy

Option 1: If the total from step 2 is **84 inches or less**, then you will need:

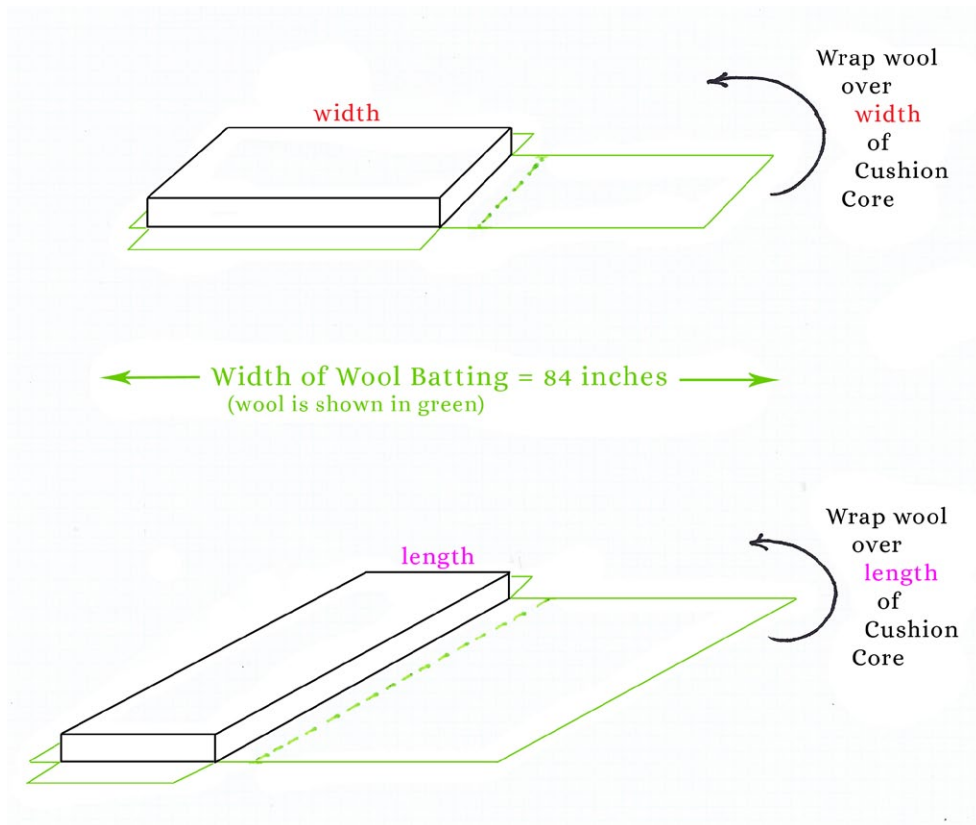

1 x _____ + 2 x _____ = total to buy _____ (inches)
 (length) (depth)

Option 2: If the total from Step 2 is **greater than 84 inches**, then you'll need:

1 x _____ + 2 x _____ = total to buy _____ (inches)
 (width) (depth)

What is 'Book-wrap'?

When using wool batting, the easiest and most economical method to wrap your cushion is the 'Book-wrap', in which the entire batt is cut from a single piece of wool, wrapped over the foam like a book cover, and stitched in place, as illustrated in the diagrams below.

NaturalUpholstery.com's wool batting is 84" wide and comes with a thin spun wool backing that allows you to easily hand-stitch or staple the batting around your cushion core. Be sure to watch the companion video "[How to Measure your Cushion for Wool Batting](#)".
